

# WU-20 LITE

WIRELESS VIDEO CONFERENCING

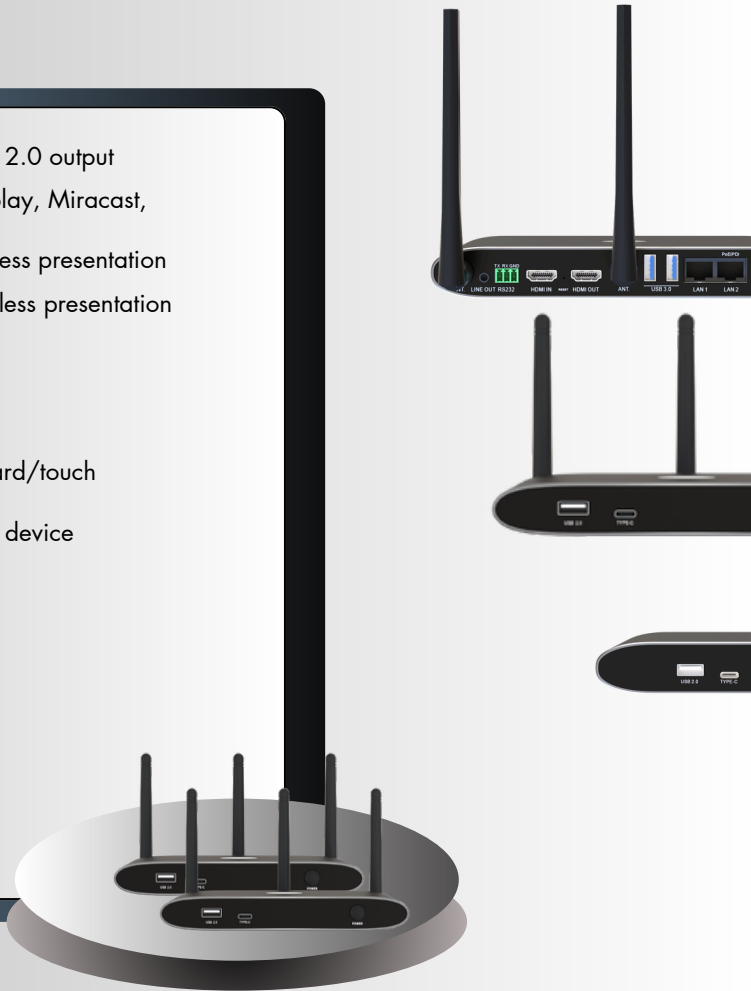

## Overview

WU-20 Lite is a cost-down version of WU-20. It eliminates some redundant hardware interfaces including dual HDMI outputs and secondary USB-B host channel, focusing specifically on essential single-screen wireless BYOM applications. It also further optimizes the configuration, such as adding analog audio input as microphone, and capturing HDMI in as camera. WU-20 Lite is the optimal balance between advanced functionality and cost consideration in modern conference rooms, it effectively addresses most of standard conference room needs for seamless BYOD content sharing and video collaboration.

## KEY FEATURES

- Wireless content sharing up to 4K resolution, HDMI 2.0 output
- Support native wireless mirroring protocols like Airplay, Miracast, Chromecast
- Support plug-n-play HDMI/Type-C dongles for wireless presentation
